

Over 1000 references

TIL TECHNOLOGIES secures many office buildings. From high-rise buildings to business parks, multi-tenant or LEED/HEQ (High Environmental Quality) buildings, all share common needs : controlling a large number of areas and offices , managing important flows (employees, visitors, cars, elevator...) and limiting energy consumption.

This is why TIL TECHNOLOGIES has developed specialized functions, such as Visitor Management or Elevator Management, and integrated equipment such as digital door locks. TIL TECHNOLOGIES can meet all service sector needs.

TIL ALREADY EQUIPS

OFFICE FACILITIES

- EUROPOLE WTC - Grenoble

OFFICE BUILDINGS SECURITY

AGILE SOLUTIONS
FOR EVERY SECTOR

TIL TECHNOLOGIES
ELECTRONIC SECURITY SYSTEMS

CONTROL AND OPTIMIZE FLOWS

- **Management of visitors** and external service providers :
 - Pre-registration, appointment validation, QR-code sending, pre-approval and reception on touch terminals
- **Vehicle access** management :
 - License plates recognition or long-range readers
- **Lift management** :
 - Assigning access rights to floors or any door (cabin readers)

MAKE YOUR BUILDING INTELLIGENT AND CONTROL POWER CONSUMPTION

- **People** detection or access control counting:
 - Lighting, heating or other automation...
- **Behavioral analysis** of users :
 - Statistics and reports (occupancy rate, rush hours...)
 - Detection of unusual activity or behavior
- Supervision of **energy consumption** :
 - Technical alarms and graphic monitoring
- TIL **energy-efficient** equipment, reduction of wiring, size of boxes, batteries...

CENTRALIZE AND FACILITATE USER MANAGEMENT

- **Multi-site or multi-client** system :
 - Management of several companies in the same building (common access vs. private area)
 - Management by department or manager entities
- **Gateways to other databases** :
 - Prevention of double entries and updating of rights in real time (HR, appointment management, etc.)
- Access to **other applications** with the same badge :
 - Access control, restaurant, copy machines, vending machines...

MONITORING FACILITIES AND SURROUNDINGS

- **Video surveillance** :
 - Real time observation or video verification
- **Field inspections** :
 - Control of badges and authorizations by mobile reader
 - Patrol assistance with tour management

IMPROVE AND STRENGTHEN OPERATION

- Centralized **graphic supervisor** :
 - Unified interface and interactions between systems (intrusion, video, technical alarms...) for more efficient interventions
- **Business continuity** :
 - Server redundancy
 - Offline mode in case of network failure (UTL and readers)

ADAPTING ACCESS TO ZONES AND RISKS

- Multiple identification technologies, from filtering to high security : **smartphone, badge + PIN, biometrics...**
- Easy integration of all office doors with wireless **door locks**
