

More than 300 references

Whether it is because they provide culture (museums) or because they receive a large number of visitors (stadiums, theme parks and malls), public places have to face a multitude of risks: theft, malicious acts and damage, crowd movements... including terrorist threats.

TIL TECHNOLOGIES can meet all the needs of touristic and commercial facilities.

TIL ALREADY EQUIPS

MUSEUMS

- Château de Versailles
- Musée d'Orsay - Paris
- MUCEM - Marseille
- Royal Museums of Fine Art - Bruxelles
- Grenoble's Museum
- Basque Museum - Bayonne

- Pullman Palace - paris
- Monaco's Country Club
- Casino Barrière - La Baule

ENTERTAINMENT & HOSPITALITY SITES SECURITY

AGILE SOLUTIONS
FOR EVERY SECTOR

TIL TECHNOLOGIES
ELECTRONIC SECURITY SYSTEMS

REINFORCED ACCESS CONTROL TO CRITICAL ZONES

- **Strong Authentication:**
 - Authorization of employee access by biometrics, reinforced control (badge + code) or video control
- **Fine rights management:**
 - Assignment of rights according to profiles, professional accreditation, time slot and validity dates
- **Behavioral analysis of users:**
 - Detection of unusual activity or behavior
 - Log of operator actions to supervise security agents

TEMPORARY RENTAL OF MEETING SPACE

- **Digital door locks** on lodges, seminary rooms, flexible reception area, mobile partition wall...

MANAGE CRISIS AND EVACUATIONS

- **Emergency button:**
 - Fast evacuation of audience, global or according to zone, through simultaneous barrier opening
 - Panik button at the cash desk in case of robbery
- **Link with emergency services (Prefecture, ...):**
 - Counting and communication about the number of visitors (+ identity if available) to adapt and make the intervention more efficient
- **Emergency vehicles access:**
 - Automated gate and retractable bollards, vehicle acknowledgement Police, Fire Brigade, EMS...
 - Link intercom + video for remote supervision
 - Identification through number plate or UHF badges
- **Access zones in crisis mode:**
 - Access restrictions according to employees « grades » and in relation to crisis scenarios and security level of each reader

MONITORING SITE AND ITS SURROUNDINGS

- **Perimeter intrusion detection:**
 - Facade radar, active gates or infrared barriers
- **Video surveillance:**
 - Real time monitoring or verification
- **Field inspections:**
 - Patrol support tool with on-site patrolling assistance
- **Anti-theft supervision of equipment:**
 - Dry contacts, sensors, RFID tags...

MANAGE EXTERNAL PROVIDERS

- **Schedule access rights:**
 - Appointments/visitors in the access control system
 - Link with a specialized logistic application
- **Incoming vehicle control:**
 - QR-codes sent on smartphone
 - Automatic number plate recognition
- **Greeting and guidance of visitor:**
 - Touch terminal for driver self-registration
 - Display panels for displaying instructions
- **Traceability informations** through reports edition on passages, receipts/shipments...

CENTRALIZE AND FACILITATE OPERATION

- **Multi-site management** or shared site management, via responsibility (multi-manager)
- **Gateways to other databases (HR...), other security systems** or intercom or even other professional applications
- **Single graphical interface** for access control, intrusion, video and technical alarms
- Archiving and **searching related events** (alarms, people counting, related video...)

OPTIMIZE FLOWS

- **Simplified event hosting** with badge mobile readers and QR-codes or manual research
- **Car Park management** and vehicle access:
 - Barriers + long range RFID, plates, QR-codes...
- **Control and count attendance on site:**
 - Zone supervision, anti-passback with unicity equipment
 - Real time counting with alarms or block in case of reached level
